Location: Novosibirsk, Russian Federation (open to relocation)

Phone number: +7 913 396 76 77

Experience

LEDAS, Novosibirsk – Backend Developer: development of a desktop and WASM (Qt-based) architectural CAD application

04.2024 – now

Responsibilities:

- In-viewport dimensions input system.
- Client-side persistent settings (using Windows Registry).
- Annotations, tags and object labels functionality and visuals (client + server).
- Customer models automated testing and validation (including server-side checks and conversions).

Tasks:

- Implemented a way of integrating WPF-based user plugins into a Qt application (using win32 API), and enabled their two-way communication.
- Added functionality (frontend + backend) for multipage PDF exports, implemented different export parameters.
- Merged annotation objects labels with the tags system, allowing for customization and movement with proper restrictions for each view.
- Researched and found and/or fixed multiple crashes and bugs throughout application in different areas (rendering, custom plugins, server interactions, UI interactions, automated testing, object creation/visual/editing/deletion, selection visibility and multiselecting, view exporting).
- Implemented many user QoL features in both interface and viewport controls and rendering (annotations customization, objects rendering order, move tool restrictions, objects visibility based on order and height, application condition saving).
- Refactored in-viewport input system, client settings system and annotation objects.

Novosibirsk State University, Novosibirsk – Teaching Assistant: teaching bachelor courses (practical lessons) [“Computers and peripherals”](#) and [“Basics of parallel programming”](#)

09.2024 – 06.2025

Programming languages

C++ (Qt, QML), C# (WPF, Unity), Python, Java, Lua, JavaScript, Kotlin, C

Stack

- OOP, systems programming, compilation theory, parallel programming (POSIX Threads, MPI, OpenMP)
- Windows, Android, UNIX
- Git, Docker Compose
- SQL (MySQL), ORM
- Qt, Spring (Boot, Data, Security), Hibernate, REST API
- Assembler (RISC ATmega168)
- IDE and AI-assisted development
- Code reviewing, mentoring

Languages

English (C1, 8.0 Academic IELTS 2024)

Russian (native)

Education

Novosibirsk State University, *Information Technology Department* (bachelor): 2020 - 2024

Novosibirsk State University, *Information Technology Department* (master): 2024 - now

Projects

[DeGSA](#) – LuNA (declarative dynamically typed language) static analysis tool based on AST and DDG, part of the ADAPT static analysis software; published papers [Goosechaser](#) – flight simulator on Unity
